# **Xyng: Fuel for Life**

#### What does Xyng do?

Xyng is uniquely formulated to give you that added boost to your mind and your body to sustain you throughout the day. The exceptional benefits of Xyng may include:

- Increased energy
- · Enhanced thyroid function
- Mood enhancement
- Improved focus
- · Ramped up metabolism
- Appetite suppression

The result is a natural energy derived from herbal ingredients, vitamins, and minerals that can help control your appetite, increase your energy and create a euphoric feeling of excitement and positive mental energy.

#### **Key Ingredients**

**VITAMIN B12** - Essential for metabolism of proteins and fats and essential for red blood cell production.

**CHROMIUM** helps to stabilize blood sugar levels and can be critical to the synthesis of cholesterol, fats and proteins.

**DICAFFEINE MALATE** is the backbone of the energy blend and is specifically designed to be gentle on the stomach. By slowing the digestion of the Caffeine by bonding it to Malic Acid, it creates a delayed release effect leading to a cleaner, more balanced energy.

**GREEN COFFEE EXTRACT** (dried seeds) - Essential for weight loss. Active ingredient chlorogenic acid (CGA) inhibits the absorption of glucose in the small intestines. This effect lowers the level of glucose in your blood stream so that your body burns fat cells for energy.

**PHENYLETHYLAMINE** (PEA) is a compound that is naturally found in the brain Benefits include: mood, mental acuity, energy, and focus.

**GARCINIA CAMBOGIA**, the active ingredient in Garcinia Cambogia, is Hydroxycitric Acid (HCA). HCA has been shown to increase serotonin levels to support a positive mood. Research suggests that HCA is effective at improving weight-loss. Recent studies suggest that HCA may encourage the body to burn fat for fuel as opposed to carbohydrates and improve athletic performance by increasing exercise endurance.

**RHODIOLA** Is to help balance hormones and support the body's natural resistance to stress.

**EVODIAMINE** which is a bioactive alkaloid extracted from Wu Zhu Yu, an herb used for hundreds of years for weight loss in Asia. Evodiamine promotes fat metabolism and fights fat storage, acts as a diuretic, and works as a powerful thermogenic.

**SCLAREOLIDE** Increases energy and helps maintain lean muscle mass during weight loss. Sclareolide works to increase ATP conversion to cAMP, which then speeds up several cellular processes including fat metabolism and thyroid production.

 $\label{lem:coleus} \textbf{COLEUS FORSKOHLII} \ \ \text{and} \ \ \textbf{UNDARIA} \ \ \text{extract which both increase} \\ \ \ \text{production of thyroid hormones}.$ 

**UNDARIA PINNATFIDA EXTRACT** - Undaria Extract has been recognized as an amazing source of the active lipid compound fucoxanthin. Fucoxanthin has been shown to increase the rate at which abdominal fat is burned. Fucoxanthin accomplishes this task through increasing the production of a protein called UCP1, which then uncouples white fat from the fat cell, freeing the fat up to be burned.

**IRVINGIA GABONENSIS** (African Mango) and **HORDENINE**, which both support healthy weight loss and overall health and wellness.

### Add a little Xyng to your day!
